This is the Italian (Roman in Civ3) Ariete main battle tank.

I think this is just a flavor unit for the Roman Modern Armor, and it should use similar stats.

As always (for those who know my work), I have to add some more personal sounds. Here I just modified existing ones to fit the animations. But I'm not really good at this ☺

Check the Ariete thread (on Civfanatics or CDG) or the Units [Uptades Announcements thread](#) for updates.

This zip includes FLC's, ini file, and pedia entries/icons.

The pedia entries contains some options you could want to apply on this tank, so just delete what doesn't fit your stats.

Have Fun !
